

- ▼ **1 Introduction and Overall Goal**
 - 1.1 Mission
 - 1.2 Value proposition
 - ▼ 1.3 Target Audiences
 - 1.3.1 Client-to-MLS
 - 1.3.2 MLS-to-MLS
 - 1.3.3 MLS-to-trading partner
- ▼ **2 Compatibility with 1.0**
 - 2.1 Compatibility via wrappers or fully-automated translators
 - 2.2 Transaction-level compatibility
- ▼ **3 Performance**
 - 3.1 Retention of COMPACT format
 - 3.2 Implications and solutions for using standard SOAP toolkits
 - 3.3 Performance in a pure-XML environment
- ▼ **4 Ease of implementation**
 - 4.1 Implementation of protocol
 - 4.2 Implementation of implied functionality
- ▼ **5 Security**
 - 5.1 Transmission of capability information
 - 5.2 Single signon facilities
 - 5.3 Data encryption
- **6 Query Language Requirements**
- ▼ **7 Transaction Management Requirements**
 - 7.1 Transaction types to support
 - 7.2 Object model
 - 7.3 Transaction type support matrix (common requests/common responses)
- ▼ **8 Data Structures Requirements**
 - 8.1 Object model
 - 8.2 Internal referential integrity
- ▼ **9 Requirements for Interoperability with Other Standards**
 - 9.1 Direct interoperability
 - 9.2 Conformance to requirements for submission to higher standards bodies
 - 9.3 Plug-in mechanism for adding new interoperability features
- ▼ **10 Deliverables**
 - ▼ 10.1 Documents
 - 10.1.1 Specifications
 - 10.1.2 User implementation notes
 - ▼ 10.2 Code
 - 10.2.1 Libraries
 - 10.2.2 Demonstrations and samples
